

## ASP Hosting

triPRACTIX offers the convenience of a turnkey healthcare-driven, advanced, secure, and affordable, solution.

### Why triPRACTIX Hosting?

Our hosting solution for GE Centricity® Practice Solution products offers peace of mind while saving you money.

- Eliminate the need to install, configure and maintain an internal server at the practice location, resulting in significant CapEx and OpEx savings.
- 5-year Total Cost of Ownership is lower than in-house servers.
- Minimize IT headaches. Let your technical resources concentrate on other matters – not the challenges and hassles of maintaining servers.
- Save capital – match revenue with expenses.
- Ubiquitous access to your resources from anywhere in the world using a secure on-line portal via the Internet (<http://www.myTPX.com>).
- HIPAA/SOX/NEBS-compliant design.
- We maintain the industry's Gold-Level standard of 99.995% availability.
- Our data center was built to world-class standards in every critical area, including: fire suppression, security, power, cooling, connectivity and remote administration tools.
- Redundant architecture in every area of network connectivity, storage, and server performance.
- No worries – Backup and Disaster Recovery Plan in an offsite facility.
- We offer a fully-functioning operations and support model – contact us on-line or by phone.

The triPRACTIX hosting solution allows you to focus on the business of healthcare, not the challenge of IT.
