

Cisco Unified Communications solutions allow you to converge all enterprise needs to one network platform.

Voice, Video, Data – Streamline your operations.

Cisco Unified Communications solutions allow you to converge all enterprise communication needs onto one network platform. As a result, you achieve lower operational costs, increased productivity, reduced errors, and an improved client/patient experience. Whether it be delivering voice mail to your Microsoft Outlook inbox, providing patient data from your Electronic Medical Records application, or displaying an operational dashboard from your HIT system – Cisco Unified Communications creates the synergy that will streamline your operations.

Cisco Unified Communications Benefits

With your Cisco Unified Communications solution, you'll experience:

- **Cost Savings** – One network, one support team to administer voice, video and data.
- **Simplified Administration and Maintenance** through converging your voice and data network.
- **Greater Efficiency** by unifying your voicemail messages with Microsoft Exchange and viewing applications on your IP phone interface with EXTENSION®.
- **Time Savings** – Use point to point video conferencing, receive your voicemail as email messages.
- **Customer Satisfaction** – Intelligently route your incoming phone calls directly to the right people.

Convergence is happening. Cisco Unified Communications is the best way to optimize your existing infrastructure while eliminating unnecessary costs and overhead. From video conferencing to integrating your mission-critical applications to mobilizing your workforce, triPRACTIX provides the Cisco Unified Communications solution that will power your success.
